

NAVIGATING THE SEA OF INTERNET SPEED OPTIONS

Does choosing the internet speed you need have you feeling like a fish out of water? The way to find the service that best fits your needs is to shine a little light on your network, devices and online lifestyle. **LET'S DIVE IN.**

HUNGRY, HUNGRY HOUSEHOLDS

The number of connected devices in homes is growing exponentially, **pushing the bandwidth needs of our networks to all-time highs.** Some of the most bandwidth intensive online activities have quickly become a few of the most common ways we use the internet today. **How often do you...**

Stream HD or 4K video on a streaming service?

Play competitive online games?

Communicate via video call?

Download large files or images?

Run smart home devices such as assistants, thermostats and front door cameras?

MAKE A SPLASH WITH A SPEED UPGRADE

When it comes to a good online experience, the right internet service can keep your network above water, but it's a matter of **sink or swim if you don't match your speed capabilities with the number of devices you have connected and in use simultaneously.**

SHIP SHAPE SERVICE

Here's a look at three common internet speed tiers and their capabilities.

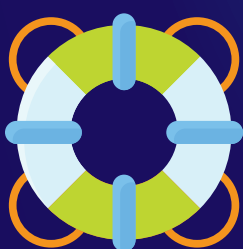

1Gb/50Mb
Ideal for
10 or more devices

250Mb/25Mb
Ideal for
7 to 9 devices

100Mb/20Mb
Ideal for
5 to 6 devices

STILL IN TOO DEEP?

Managed WiFi can help you connect devices, troubleshoot your network and configure your router for a strong signal throughout your home. **Find out more at arvig.com/managed-wifi.**
